Page 148—Paragraph 293, line 4 to Paragraph 295, line 1; read:
entrance, wider inside, and has steep shores. **Bolles Ledge**, near the head and about 250 yards (229 m) off the E shore, is covered by a least depth of 1.8 fathoms (3.3 m). A long log boom extends from the NE end of an inoperative pulpmill to the ledge. **East Island** is a wooded islet off the NW side of the entrance. A midchannel course leads safely into the cove, and there are no known dangers other than those mentioned.
Anchorage may be had in 10 to 20 fathoms (18 to 36 ...
